EDUCATION

2017 - present

bachelor of mechatronics engineering

Future University

Very passionate about modern technologies of software developing , embedded systems and IOT.

Jan 2019 - Feb 2019

Arduino

Sumakers lab

Building simple embedded systems using arduino microcontroller.

Apr 2020 - may 2020

Comptia A+ (220-1001 & 220-1002)

Online Courses

Computer software and hardware

WORK EXPERIENCE

2020 - present

desktop development

Freelancing

Building modern style desktop applications using electron framwork for a high quality user experience.

2020 - present

web developer

Freelancing

Building a high quality websites using React framwork with a responsive and modern style.

2020 - present

Backend api developer

Freelancing

Dveloping a backend api using FastApi python framwork for a fast performance, data validation and a high security.
